

Americans with Disabilities Act - Venue Information

At the Salt Palace Convention Center, we are committed to complying with the Americans with Disabilities Act by providing an inclusive and accessible environment for all guests. We require show management, general service contractors, decorators, and other contractors with events to follow the law in planning and execution.

Here are some of the ways we ensure inclusiveness and accessibility at our facility:

- Our venue provides easy access and navigation to all guests, with accessibility buttons at each lobby entrance and ADA-compliant signs throughout the building, including braille for our visually impaired guests.
- We offer accessible parking spots in both the South and on level one of both parking lots.
- We have a limited inventory of mobility rentals. Our rentals are available for pick up at the Guest Services office just north of Hall A. To reserve a mobility rental, contact our Event Technology team at (385) 468-2229 or complete an online order form on our Salt Palace website by clicking on the exhibit tab and selecting the order services option on the page. Our rental options include:
 - Standard Scooter: 4-wheel scooter with basket. 250 lbs. max. \$85 per day.
 - Deluxe Scooter: Heavy-duty, 4-wheel scooter with basket. 400 lbs. max. \$105 per day.
 - Standard Wheelchair: Manual wheelchair with 20" seat. 250 lbs. max. \$30 per day.
 - Deluxe Wheelchair: Manual wheelchair with 22" seat. 450 lbs. max. \$40 per day.
 - Multiple Day Rentals:
If you are renting for multiple days, you can choose to keep the equipment with you for the duration of the rental or store it overnight at Guest Services. If you would like to store your equipment with us, simply bring it to the Guest Services office at the end of your day. We will secure it and charge it so it will be ready for your use again the next day.
- To ensure the comfort and convenience of all guests, we have ADA-compliant restrooms available throughout the venue.
- We offer water fountains at a lowered height for easy access and water bottle refill stations.
